

OUR STORY

We are a concept that embraces a healthy and sustainable lifestyle by providing menu items that are full of nutrients and packed with nutritious energy that will make our guests feel better and more productive in their everyday lives. Our food provides an incredible flavor naturally because it's fresh, local, and prepared from scratch.

Our concept is a step above fast-casual, instead fitting into the newly emerging "fast fine" restaurant space, providing chef-prepared food that you would expect from a quality table service restaurant, but at a far superior value.

The store interiors are based on a concept we call "barn meets loft." This contemporary combination of natural, reclaimed surfaces combined with clean, contemporary sightlines creates an authentic and pleasing dining atmosphere.

We are committed to doing the right thing for our customers, our employees, our communities and our world. Caring for the environment we live in is equally as important as caring about the food that promotes healthy living. We plan active participation and sponsorship of local initiatives that drive the special spirit of our brand.
